MAYCO CRACKLE GLAZES

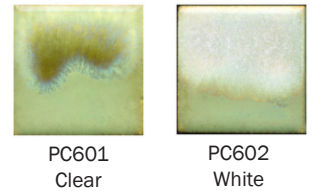

Formulated to create patterns of cracks similar to crazing at cone 06, Crackle Glazes result in a unique antique look. To highlight the cracks created in firing, antique the piece with india ink (as shown in the images below), acrylic paint, or a mineral-spirit-based woodstain. Apply a coat of the desired color to the fired piece and wipe off with a soft cloth. Crackle glazes are nontoxic, but NOT safe for food or drink containers because of their cracked surface. See page 16 for the India Ink that we used on these tiles.

MAYCO POTTERY CASCADES

These cone 06 glazes produce special effects when used in combination with other nontoxic glazes. PC602 White intermingles with the other glazes, introducing pure white and blending with the color. PC601 Clear produces a flowing effect and allows the color of the base glaze to show unaltered – but in motion. Use them over or under any nontoxic glazes. Experiment to find your best combinations!

AMACO INKS

This Ceramic Printing Ink is a printmaking ink designed for use on ceramics - great for screenprinting, craft foam printing, and monoprinting! A thin application yields best results. With a saturated color, you can apply this ink to unfired clay (greenware) or bisque. Remains true to color at all firing temperatures.

Can be used with or without glaze, but is only Food Safe with a gloss or semi-gloss glaze to seal the ink. Fires to cone 05, but can go up to cone 6. Available in 8oz only.

SPECTRUM METALLIC GLAZES

These cone 05 glazes are lead-free, but contain other heavy metals that may leach from surfaces and should NOT be used on food or drink containers. They should NOT be used by women who are pregnant or contemplating pregnancy. Keep these glazes out of the reach of children. If swallowed, promptly seek medical attention. These glazes may vary in appearance depending on the conditions of usage, firing cycle, glaze application thickness, and the underlying clay body. Always test your glazes! Available in pints only.
