## Clear Glaze Dipping Tips

- Store dipping glazes in a cool, dry place away from heat and vibration.
- When dipping, make sure your fingers are dry to prevent smearing.
- While dipping, re-stir the glaze every 15-20 minutes to maintain proper consistency.
- Keep container tightly closed when not in use. Evaporation may cause a slight thickening of the glaze, which can affect its performance on your work.

## MAYCO

### Brushing Glazes

Natural Clear (S2101) & Matte Transparent (C300)  
S2101 is a clean, glossy clear glaze and C300 produces a matte sheen but will turn glossy at higher temperatures. Both are nontoxic, lead-free, dinnerware-safe, and overglaze-compatible. Some underglaze colors may change due to chemical interactions with the glaze.
