Chavant Modeling Clay

Chavant Fine Art Sculpting Clay, also known as Plasteline, is suitable for students (at all levels) and professionals that create fine art, special effects, or product design work. **2lb blocks** are each individually wrapped, in cases of 20.

Clayette

Clayette is a fantastic fine art sculpting clay. It's sulfur-free, non-toxic, non-drying, odor-free, and non-sticky while feeling smooth and seamless. Excellent choice for fine art modeling, as well as mold making applications.

NSP (Sulfur Free)

NSP is a sulfur-free, somewhat stiffer, waxier, sculpting Plasteline often used for product prototypes. It works well with most molding materials. It can be melted and poured at approximately 185° F. To melt and pour, do not use direct flame or direct heat.

Magic-Sculp

Magic-Sculp is a two-part resin putty useful for repairs and small, detailed objects or accessories where clay is too fragile. Knead together equal

amounts of the two components and begin working: stuff and smooth it into cracks or rough out your desired shape. When Magic-Sculp sets, it can be sanded, cut, drilled or carved. Magic-Sculp comes in a neutral color and accepts paint. **DO NOT FIRE IT.**

MS5.....5lb kit\$45.95

K143

SC1161

Microcrystalline Wax

Victory White is a soft micro wax with a matrix of extremely small crystals, and melts at 149°F. Just as workable as Victory Brown, which melts at 170°F, but has less surface stickiness. Neither are suitable for candles.

Aquavar

Aquavar, a water-based resinous plastic, is a versatile paint product for art and craft use. Use it as an adhesive or for watercolor, gouache, posters, gesso, acrylics, collage, paper mache, decal transfer, unfired pottery glaze, and more.

- Bonds sand, rock, wood or metal to canvas or any porous surface. For tissue paper collage or paper mache, thin Aquavar about 50% with water.
- Make your own acrylic paints, any color: Add a few drops of liquid household detergent to full-strength Aquavar. Mix this liquid into dry tempera paint with a flat knife or the back of a spoon.
- See our free instruction sheet on how to use Aquavar for an unfired, crystal clear, oven-cured protective glaze.
- Aquavar seals and protects your projects made of plaster gauze, paper mache, and other porous materials.
