

MAYCO SILKSCREENS

Mayco Designer Silkscreens are an easy and creative way to add intricate detail to your work. Use the Silkscreen Medium (AC-310) with underglazes, Stroke & Coats or Designer Liner to create a ceramic "paste", then rub the paste through the screen onto your piece. The screen size is 12½" h x 18" w, with the actual printed area measuring 11½" h x 15" w. Except for the stripes and chevrons, designs are arranged on each sheet with planned gutters so you can fold without affecting other designs. The screens are lightly folded and the crease does not impact design reproduction. Individual designs are approximately 3" to 4" at their longest dimension.

LASER DECAL TRANSFER PAPER

- Decals are monotone only, not in color. The black image on the paper fires with sepia-to-brown colors.
- Each pack contains 10 sheets.
- Step-by-step, easy-to-follow firing instructions are included with each pack of transfer paper.
- Fired-on images have been certified as lead and cadmium free, and are safe for use on dinnerware.

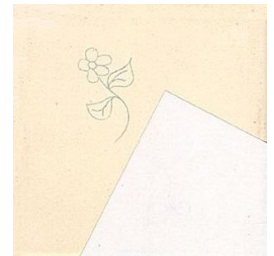

The above low-fire tile was done by applying the decal to a bisque tile, doing a 2nd bisque firing to set the decal, and then using washes of EZ Stroke to tint the image. Duncan Pure Brilliance Clear Glaze (on page 39) was brushed over the top and fired to cone 05.

TP Laser Decal Transfer Paper \$31.99

CLAY CARBON PAPER

Specially treated paper for transferring designs or patterns onto ceramic greenware, dried glaze or underglaze surfaces.

AC230 (12 sheets per pkg)

- 1-11 pkgs @ \$4.80 ea
- 12+ pkgs @ \$3.84 ea

SILKSCREEN MEDIUM

AC-310 Silkscreen Medium is a thickening agent that, when added to Stroke & Coat®, Designer Liner or Underglazes, create a paste which is pushed through the screen onto bisque or unfired glaze surface. The design transfers onto ceramic surfaces with ease. Designer Silkscreens work on ridged or curved surfaces and may also be used as an outline to fill in images with color.

AC310 \$4.50 ea
