

# Creating & Enhancing your Ceramic Surface

Using your choice of Interactive Pigments, Glazes or Combo's

With all the flowers shown on this page, the pigments were applied to ^04 bisque and wiped back, leaving the pigment in the recessed areas.

Try your favorite glaze(s) over a variety of pigments. To the left we show our GLW12 Eggshell Wash and PG636 Aegean Blue Green (a soft celadon). The chemistry of the glaze, your choice of clay body and the pigment will be unique to you.

Interactive Pigments wiped back under 8 of our New Glazes (see the key at the bottom left of the page.)

IP202 Tree Bark

IP203 Golden Straw

IP205 Autumn Foliage

IP206 Surf & Sand

IP207 Steel Black

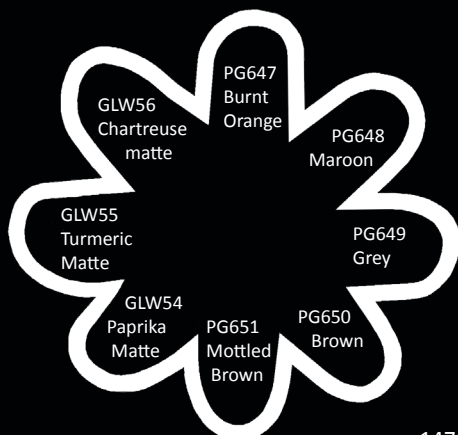

IP208 Winter Storm

IP211 Wormwood

IP212 Indigo

Just for fun ... overlap PG641 White Cloud glaze over the same set of glazes. Have fun and see what you can create!
