PLASTER HYDROBATS

The Hydrobat is made of gypsum cement ten times stronger than conventional plaster, but with a similar water absorption rate. Two hard rubber grommets in the bottom assure snug fit on wheels with standard pin spacing.

BAT MATES

Hold down loose, worn bats and keep them from wiggling or flying off the wheelhead. Just wet it, set it and forget it! The durable material applies an ideal amount of gripping power, and will not crack or become brittle as it dries.

WARNING: rinse new batmate in warm water prior to use.
