

BANDING WHEELS & EMPTY JARS

BANDING WHEELS ... help at every stage of your projects.

See your piece from every angle, or give it a spin to add smooth, even, consistent bands of color all the way around your piece. Like brushes, we recommend that you get the best banding wheel you can afford as an investment in your art. A good one will give you many years of service.

NORTHSTAR EXTRUDERS

Break away from the limits of wheel-throwing and handbuilding! The 4" square barrel is designed for easy loading and holds 5 to 8 pounds of clay. *Special order only.*

NS910	.....Stainless Extruder w/Basic Dies	.....	\$674.99
NS950	.....Stainless Steel Extruder Package (includes 2 standard die sets shown below and Z-brace for hollow die set)	.....	\$789.99

Die Expansion Box

Work larger with your extruder! This NorthStar innovation maximizes your equipment investment by adapting 6" dies (like the dies for the Big Blue!) to your current 4" extruder. Bolt the expansion box on the bottom of your extruder, and it's ready.

NS940	.....Die Expansion Box - special order	.....	\$284.99
NS940-EX	.....Die Expansion Box Package - special order (includes die set NS991 & center brace NS983 to fit expansion box)	.....	\$439.99

NORTHSTAR DIES

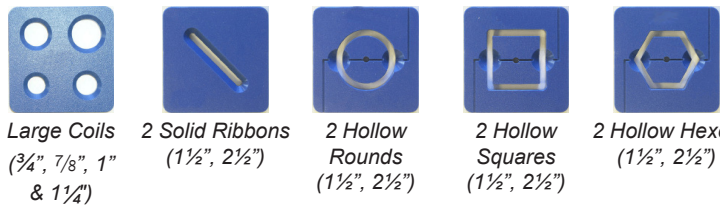

NorthStar's standard dies are made of ½" thick polyethylene, which is extremely wear-resistant and completely non-contaminating. The top edge (facing the clay in the extruder barrel) is beveled to compact the clay as it passes through for a crisper, more solid extrusion. In the hollow dies, there is a bevel on both the interior and exterior portions under each side of the bracket (which holds the hollow dies' center pieces) that helps the extrusion to "heal" after it has been split by the bracket. When you use NorthStar's hollow dies, the center part is automatically in exactly the right place and the wall thickness will be even all the way around.
