

**VYBAR 103**

(or polyboost 165) is a wax additive intended for freestanding candles. Add 1/2 - 2% to your wax by weight, or 1/4 - 1/2 teaspoon per pound (more is not better with this product). Vybar's purpose is fragrance retention; but helps eliminate wax bubbles, mottling, assists with uniform dye dispersion (for even color) and reduces surface flaws. Best with wax that melts at 130°F or higher.

AP103 .....1 lb .....\$8.95

**WICKS**

**Paper Core** - these wicks burn very hot, which yields a large melt pool. Usually used with paraffin wax containers. Large containers may need more than one wick.

WPC..... 5 yds - use up to 2" wide containers .....\$1.15  
WPC.25 ..... 25 yds - use up to 2" wide containers .....\$4.50

**Square Braid** - wicks for beeswax candles generally need to be about double the width of of wicks for paraffin candles of the same size. The wider wick produces the best flame-to-burn ratio and allows the candle to burn almost entirely and without tunneling. Trimming may be necessary to prevent burnout to the edge of your candle. Always use a catch-plate or candle holder with a base to catch hot wax run-off.

W64A ..... 15 ft - best for beeswax - makes 12-14 candles at 8" tall ..... \$1.25  
W64B ..... 60 ft - best for beeswax sheets.....\$3.00  
WSB..... 5 yds - use for up to 1" wide containers .....\$1.25  
WSB.25 ..... 25 yds - use for up to 1" wide containers .....\$4.50  
WSB1 ..... 5 yds - use for 2-3" wide containers .....\$1.25  
WSB1.25..... 25 yds - use for 2-3" wide containers .....\$4.50  
WSB2 ..... 5 yds - use for 3-4" wide containers .....\$1.75  
WSB2.25..... 25 yds - use for 3-4" wide containers .....\$6.50

**MOLD RELEASE**

This powder assures an easy release of any candle from any mold. For metal molds, use 1/2 teaspoon per pound of wax. For plastic molds, use 1 teaspoon per pound of wax.

F157.....1/2 lb ..... \$8.50  
F158.....1 lb..... \$16.25

**DOUBLE BOILER**

Place ring at the bottom of a larger pan to elevate & level your smaller melting bowl. Add water to larger pan no more than half way up the bowl. A less expensive alternative to using a double boiler system. Made of heavy duty aluminum.

FR5695.....5" x 5" x 1 1/4 ..... \$7.50

**WICK TAB HOLDERS**

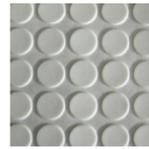

These will provide a sturdy base for your wick while pouring your wax.

WCR1...(15mm) 50/ pkg .....\$4.50  
WCR2...(15mm) 100/pkg..... \$7.00  
WCR3...(15mm) 1200/pkg..... \$25.00

**WICK TAB STICKERS**

Place at the bottom of your candle mold to secure the wick tab holder in place while pouring your wax.

WS101 ..... 100/pkg ..... \$6.25

**MOLD WAX SEALERS**

Press over wick and screw to tighten the seal, preventing wax or water leakage.

P161.....Gray 1 1/4 x 9" ..... \$1.95  
P162 ....White 2 1/4 x 5" ..... \$4.05

**CANDLE THERMOMETER**

Provides accurate temperature control and ensures the wax melts completely, mixes well with fragrances and/or dye, and poured at the right temperature. Overheating can cause your wax to be discolored or even cause a fire, while too low temperatures can lead to incomplete melting or poor mixing. A thermometer monitors the cooling as it solidifies, ensuring a safe and appropriate cooling rate to prevent cracking.

D611 ..... \$8.90

Plaster is one of the most flexible, versatile art materials ever.

Molds, sculpture, hobby crafts, medical & dental uses: plaster serves all these needs and more. We can help you determine which plaster is right for your use. For molds: measure the length x width x height to get your cubic volume. An easier way is to use a box that will fit the object and fill it with rice. The weight and physical volume of the rice is what you will need for your mold.

**USG1 - #1 Pottery Plaster**

Formulated to provide stronger, more durable molds than regular pottery plaster. The standard of the industry.

**USG2 - Molding Plaster**

Great for plaster bats! A good utility plaster when expansion, hardness and strength are not of great importance.

**USG3 - Casting Plaster**

Great for casting plaques and figurines, formulated for greater strength and chip resistance than regular plaster. Working properties and set time similar to Hydrocal White.

**USG4 - Laboratory Dental Plaster**

A general dental application plaster with a set time between 6 and 9 minutes.

**USG6 - Hydrocal White**

Our most general use plaster cement. It can be carved or added to, has excellent plasticity for workability and a gradual set time.

**USG7 - Cerami-Cal**

Low consistency, smooth-wearing mold material for use in pressing clay ware. Low absorption. Specified for use with Ram clay-forming equipment.

**USG11 - Hydrostone**

Hydrostone is an extremely hard and strong plaster with very low viscosity for excellent detail reproduction. Primarily used for high quality art, novelty and statuary castings. Available in a non-yellowing formulation. Moderate expansion properties.

**USG12 - Hydrocal 105**

Very similar to Hydrocal White, but tinted a pale yellow for dental work.

**PLASTER GAUZE ROLLS**

For masks, mold backing, foundations and parts of sculptures: there's no end to the hundreds of uses for this versatile tape. Measures 4" x 15 feet and covers 5 sq feet. Fine cotton gauze embedded with plaster - just wet down and use. Sets in 5-8 min.

**RATIO FOR PLASTERS**

**For USG1, USG2, USG3, USG4:**

- Ratio of Mix should be 1 part water to 1 1/2 parts plaster by weight.

**For USG6 & USG12:**

- Ratio of Mix should be 1 quart water to 5 pounds USG6 or USG12.

**For USG7**

- Ratio of Mix should be 16 1/2 pounds water to 50 pounds USG7 by weight. USG13 can go up to 18 pounds of water.

**For USG11:**

- Ratio of Mix should be 5 1/2 pounds water to 50 pounds USG11.

**MIXING INSTRUCTIONS FOR ALL PLASTERS**

- Dump plaster in water.
- Soak 2 minutes.
- Mix two minutes to heavy cream density.
