

TIE DYE GLAZES

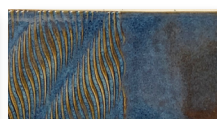

These cone 6 oxidation glazes offer a wide range of color variation by utilizing thick to thin applications. These glazes will enhance any smooth or textured surface. They also “move and flow”, so be sure to leave a generous foot on your pots and apply heavier applications at the top of your vertical vessels to allow for any flow.

Tie-Dye set

TDK1.....4oz each of all 12 colors \$83.40

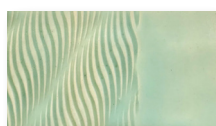

(retail value \$139.00)

SATIN GLAZES

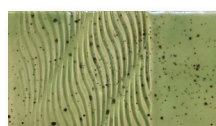

These cone 6 oxidation glazes have a rich, soft, glowing surface. Many of these glazes are semi-transparent and work great with Georgies Interactive Pigments. Mix and layer to create new shades and tones. The ‘satin’ surface creates a great assurance of food safety and durability without the gloss. These glazes are zinc-free.

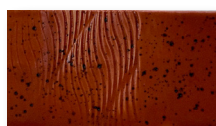

GS402 • Translucent
