**AIR DRY CLAYS
SELF-HARDENING**

Marblex, and its Terra Cotta counterpart Mexican Pottery clay, are moist and ready to use for anything from sculpting to wheelthrowing. Knead them to increase their plasticity before use. Allow your finished pieces to dry slowly and evenly on all sides at room temperature, and away from heat, until hard. When completely dry, finished pieces are durable - but NOT waterproof. After decorating, it's a good idea to coat them with a shellac or varnish to seal it and make your piece water-resistant.

- DO NOT FIRE & NEVER USE FOR FUNCTIONAL WARE -

SCULPTAMOLD

SCULPTAMOLD is a dry, white non-toxic compound that models like clay and sets up plaster-hard in 30 minutes. Shake the closed bag to blend the contents well. In a separate bag, pull out as much dry material as you can use within the 30 minute time frame, add water as directed on the bag and begin modeling. Clings to almost all clean surfaces and can be applied to an armature or any core without cracking. Add freshly mixed layers to build up thickness and add details.

SC3A 3lb bag..... \$11.80

MAGIC-SCULPT

Magic-Sculpt is a two-part resin putty useful for repairs and small, detailed objects or accessories where clay is too fragile. Knead together equal amounts of the two components and begin working: stuff and smooth it into cracks or rough out your desired shape. When Magic-Sculpt sets, it can be sanded, cut, drilled or carved. Magic-Sculpt is a neutral color and accepts paint.

**CHAVANT
MODELING CLAY**

Chavant Fine Art Sculpting Clay, also known as Plasteline, is suitable for students (at all levels) and professionals that create fine art, special effects, or product design work. **2lb blocks** are sold individually wrapped, and are also available in a case of 20 wrapped blocks.

Clayette

Clayette is a fantastic fine art sculpting clay. It's sulfur-free, non-toxic, non-drying, odor-free, and non-sticky having a smooth feel that creates seamless sculptures. Excellent choice for fine art modeling, as well as mold making applications.

NSP (Sulfur Free)

NSP is a sulfur-free, somewhat stiffer, waxier, sculpting Plasteline often used for product prototypes. It works well with most molding materials. It can be melted and poured at approximately 185° F. To melt and pour, do not use direct flame. You can place on a burner at a very low temperature or use a double boiler for best results. Once molten, brush onto cores to quickly build up to desired thickness.
